PRECISION ASSEMBLY

[PROJECT NAME]

[CLIENT] / [YEAR]

[ONE SENTENCE ABOUT THE PROJECT]

PRODUCT DEVELOPMENT CASE STUDY

THE CHALLENGE

[A CLEAR STATEMENT OF THE PROBLEM]

[Describe the starting point and why the project mattered.]

[Explain the main constraint and what success needed to mean.]

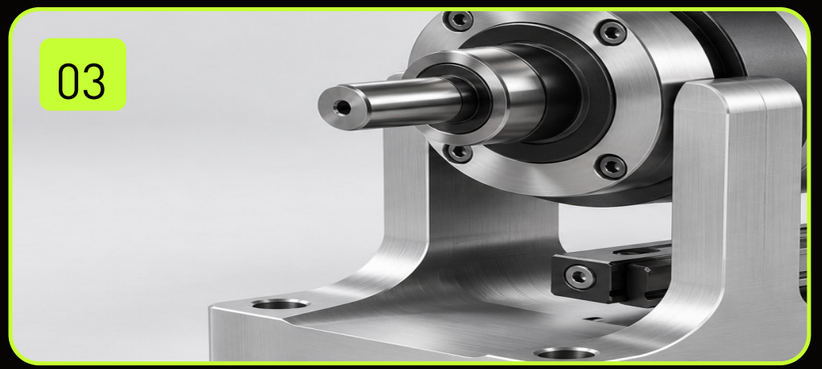

CONTEXT	[Product, user and application]
DALE SCOPE	[Your contribution and responsibilities]
CONSTRAINTS	[Interfaces, manufacturing or project limits]
SUCCESS CRITERIA	[Measurable acceptance criteria]

KEY DESIGN DECISIONS

01	DEFINE	[What did the brief establish?] [Requirement or risk that shaped the work]
02	DESIGN	[Which direction did you select?] [Alternatives considered and reason for selection]
03	ENGINEER	[Which technical decision mattered?] [Interface, material or assembly decision]
04	VALIDATE	[What did the review or test change?] [Finding and resulting design revision]

THE SOLUTION

01 [Overall design] 02 [Key detail] 03 [Interface]

SOLUTION EXPLAINED

01 / FUNCTION

[Explain the main function]

[and the feature shown in the central illustration.]

02 / INTERFACE

[Describe the connection]

[to adjacent components or the installation space.]

[FIGURE TITLE / VIEW OR COMPONENT REFERENCE]

03 / MATERIAL

[Identify the material]

[and the reason for its selection in this design.]

04 / ASSEMBLY

[Explain how the parts]

[locate, fasten or allow access for servicing.]

TECHNICAL SPECIFICATION

[PRODUCT OR SUBASSEMBLY] / [REVISION] / [DATE]

PARAMETER	VALUE	UNIT	REFERENCE
Envelope	[L × W × H]	mm	[Drawing ref.]
Mass	[Value]	kg	[CAD / measured]
Material	[Grade]	-	[Material spec.]
Surface finish	[Finish]	-	[Finish spec.]
Critical tolerance	[Value]	mm	[Drawing ref.]
Operating load	[Value]	N	[Load case]
Temperature range	[Min. / max.]	°C	[Condition]

DESIGN NOTES

[Describe the operating conditions, loading assumptions and important limits. State which parameters are targets and which have been verified.]

DOCUMENTATION

[List drawing, CAD and test report references, including revisions and dates.]

DESIGN VERIFICATION

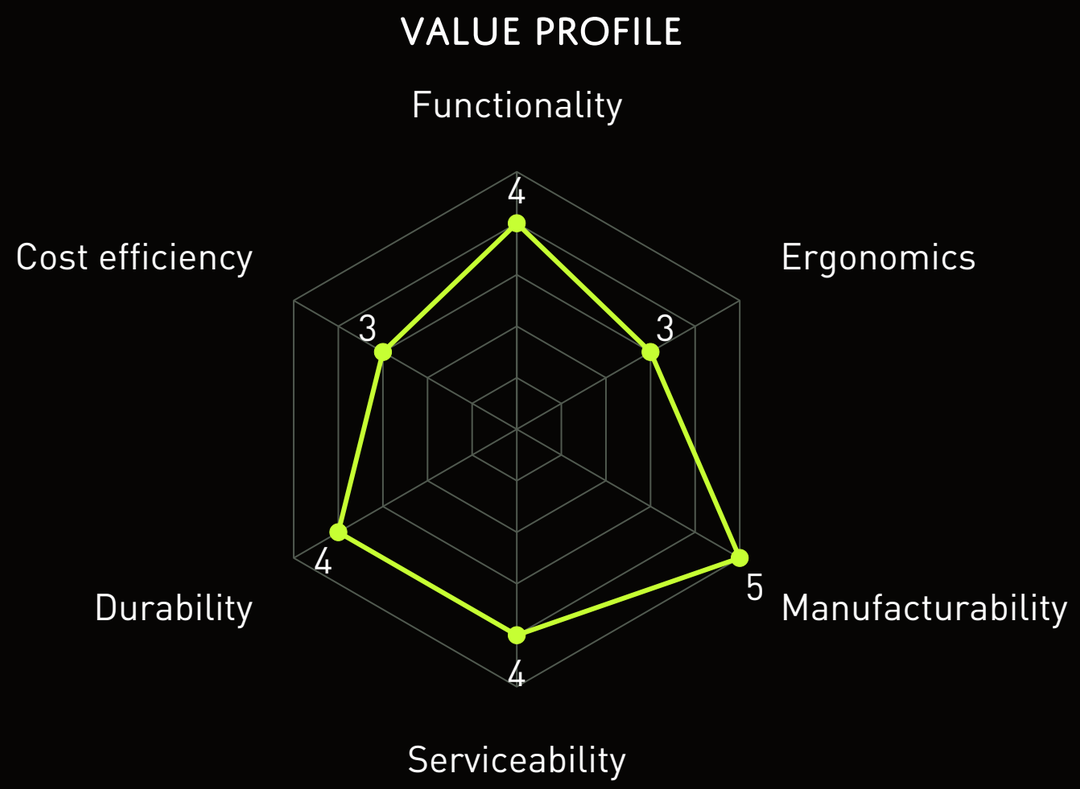

[DESCRIBE THE REVIEW, PROTOTYPE OR TEST]

CRITERION	METHOD & EVIDENCE	FINDING
[Requirement to check]	[Test or review reference]	[Observed result]
[Requirement to check]	[Test or review reference]	[Observed result]
[Requirement to check]	[Test or review reference]	[Observed result]

[State the limits of the evidence and any remaining checks.]

VALUE ANALYSIS

ILLUSTRATIVE SCORES / 0-5

ASSESSMENT BASIS

Higher score = better fit

0 Requirement not met

3 Requirement met

5 Strong performance

[Add criteria definitions, evidence and assessment date.]

EXAMPLE DATA ONLY

PROJECT OUTCOMES

[THE MAIN VERIFIED OUTCOME IN ONE SENTENCE]

01	[OUTCOME OR METRIC]	[Value, unit and comparison basis] [Evidence source or approved qualitative result]
02	[DESIGN DELIVERABLE]	[Files, prototype or documentation delivered] [What the client could do with this output]
03	[PROJECT STATUS]	[Concept, prototype, pilot or production stage] [Remaining work or agreed next step]
