LOAD & DISPLACEMENT

KEY FINDING

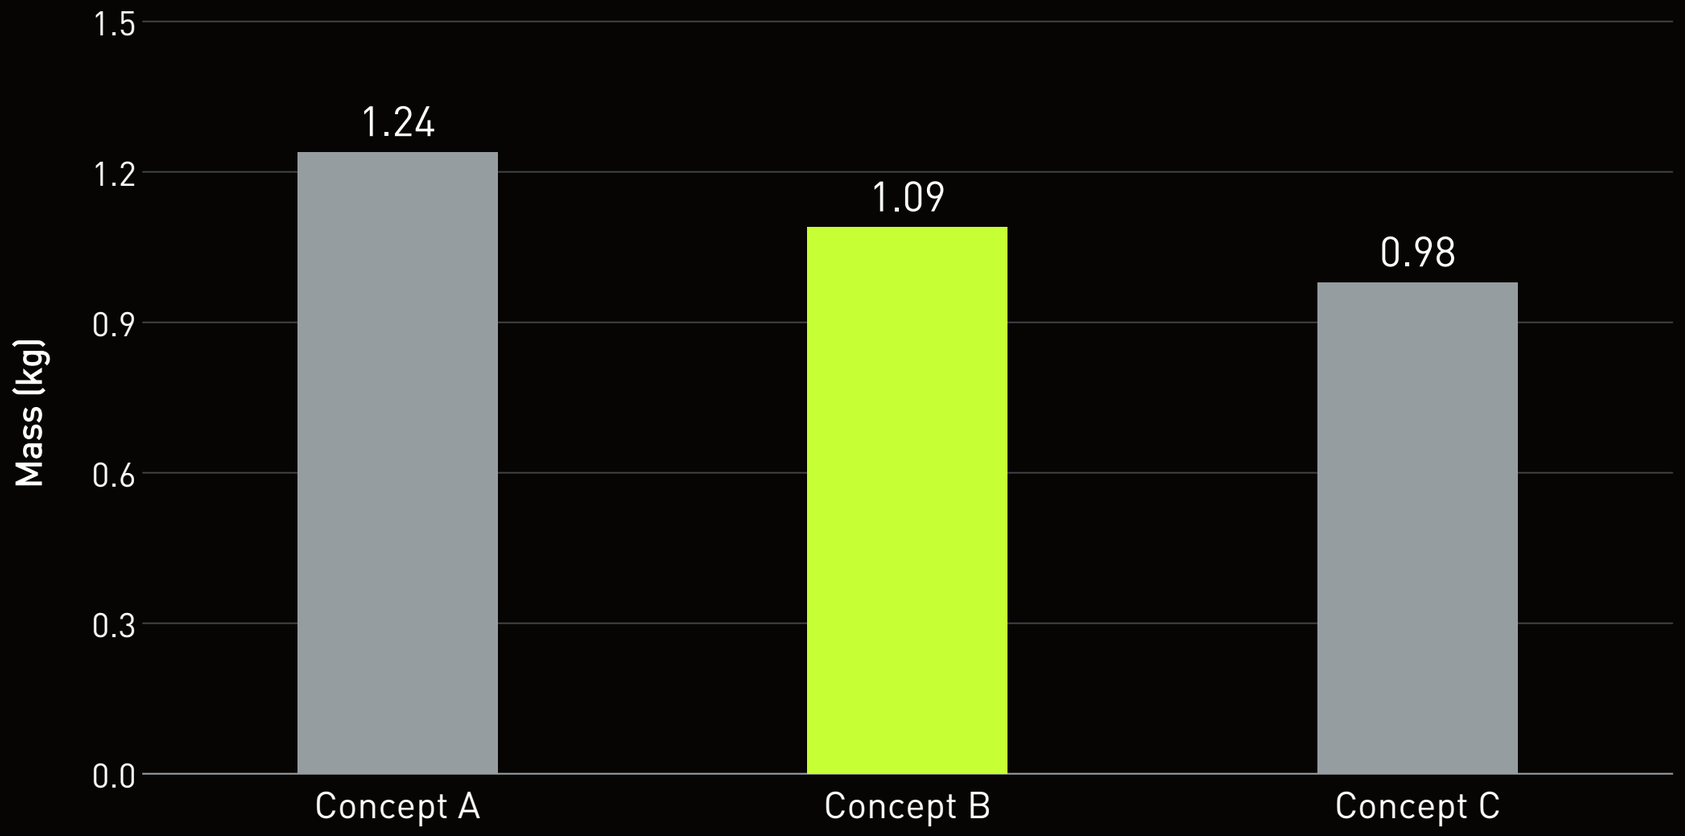

[MAIN CONCLUSION]

[Explain the comparison]
[in one short sentence.]

TEST BASIS

[Test method / fixture]
[Material / temperature]
[Report and revision]

MASS COMPARISON

KEY FINDING

[MAIN CONCLUSION]

[State the difference]
[and the comparison basis.]

COMPARISON BASIS

[Same product scope]
[Same material basis]
[CAD / source and revision]

CONCEPT COMPARISON

CRITERION	UNIT	CONCEPT A	CONCEPT B	CONCEPT C
Mass	kg	1.24	1.09	0.98
Displacement at 250 N	mm	0.78	0.60	0.68
Part count	pcs	9	7	8
Manufacturing route	-	[Add route]	[Add route]	[Add route]
Verification status	-	[Add status]	[Add status]	[Add status]

REVIEW DECISION

[SELECTED CONCEPT]

[One reason for selection]

REVIEW BASIS

[Requirements and risks]

[Evidence still needed]

[Owner / date / next step]

Compare the same scope and conditions. Keep assumptions separate from verified results.

PROCESS & REVIEW POINTS

DEFINE

Requirements and interfaces

Agreed development brief

DESIGN

Architecture and concepts

Selected design direction

ENGINEER

CAD, materials and assembly

Engineering review package

VALIDATE

Prototype evaluation

Findings and next steps

REVIEW AT EACH STAGE

[Record the review outcome, open issues and agreed next action.]

DETAILS & CALLOUTS

01 / SHAFT INTERFACE

[Explain the function or mating interface.]

DETAIL VIEW

[Describe the feature shown in the detail.]
